#### LISBURN & CASTLEREAGH CITY COUNCIL

#### MEMBERS DISCLOSURE OF INTERESTS

#### 1. Pecuniary Interests

**Pecuniary Interests** 

The Northern Ireland Local Government Code of Conduct for Councillors under Section 6 requires you to declare at the relevant meeting any <u>pecuniary interest</u> that you may have in any matter coming before any meeting of your Council.

Pecuniary (or financial) interests are those where the decision to be taken could financially benefit or financially disadvantage either you or a member of your close family. A member of your close family is defined as at least your spouse, live-in partner, parent, child, brother, sister and the spouses of any of these. Members may wish to be more prudent by extending that list to include grandparents, uncles, aunts, nephews, nieces or even close friends.

This information will be recorded in a Statutory Register. On such matters **you must not speak or vote**. Subject to the provisions of Sections 6.5 to 6.11 of the Code, if such a matter is to be discussed by your Council, **you must withdraw from the meeting whilst that matter is being discussed.** 

#### 2. Private or Personal Non-Pecuniary Interests

In addition you must also declare any <u>significant private or personal non-pecuniary interest</u> in a matter arising at a Council meeting (please see also Sections 5.2 and 5.6 and 5.8 of the Code).

Significant private or personal non-pecuniary (membership) interests are those which do not financially benefit or financially disadvantage you or a member of your close family directly, but nonetheless, so significant that could be considered as being likely to influence your decision.

Subject to the provisions of Sections 6.5 to 6.11 of the Code, you must declare this interest as soon as it becomes apparent and <u>you must withdraw from any Council meeting (including committee or sub-committee meetings) when this matter is being discussed</u>.

In respect of each of these, please complete the form below as necessary.

| Meeting (Council or Committee - please specify and name):                               |  |  |
|---|--|--|
| Date of Meeting:  |  |  |
| Item(s) in which you must declare an interest (please specify item number from report): |  |  |

| Nature of Pecuniary Interest:                         |                                   |   |  |  |
|---|-----------------------------------|---|--|--|
|   |                                   |   |  |  |
|   |                                   |   |  |  |
|   |                                   |   |  |  |
| Private or Personal Non-Pecuniary Interests           |                                   |   |  |  |
| Meeting (Council or Committee - please specify and n  | ame):                             |   |  |  |

Committee: Environment & Sustainability

Date: 9th January 2025

Report from: Head of Service – Building Control & Sustainability

Item for:

Decision

Subject: Consultation – Department for Agriculture, Environment and Rural Affairs
Consultation on the Establishment of a Just Transition Commission.

#### 1.0 **Background and Description** 1.1 The purpose of this report is to bring to Elected Members attention the Councils proposed response to the Department for Agriculture, Environment and Rural Affairs (DAERA) Consultation on the Establishment of a Just Transition Commission. The Department (DAERA) consultation opened on 12th November 2024 and closes on 1.2 13th January 2025. 1.3 Departments Consultation Description: This consultation seeks to gather views to help inform final policy development and decisions to be made by the DAERA Minister and the Northern Ireland Executive in relation to the establishment of the Just Transition Commission for Northern Ireland. 1.4 The Ministers Oral Statement can be found at: Minister's Oral Statement on Climate Change | Department of Agriculture, Environment and **Rural Affairs** The Consultation documents are available on the Department's website: 1.5 Consultation on the establishment of a Just Transition Commission | Department of Agriculture, **Environment and Rural Affairs** Elected Members were made aware of this consultation through the December 1.6 Environment & Sustainability Committee and asked that any comments be returned to the Head of Service. Any Members comments received have been included in the overall proposed response. December Full Council meeting granted delegated powers to this Committee to approve 1.7 and submit the attached proposed Consultation Response on behalf of the Council in order to meet the closing deadline. Members will find the proposed response to be submitted on behalf of the Council 1.8 attached at Appendix 1BC that comments on areas relevant to Councils services and functions. 2.0 Recommendation

It is recommended that the Environment & Sustainability Committee approves the response in **Appendix 1BC** to be submitted to DAERA in relation to the Consultation on the Establishment of a Just Transition Commission, by closing date of 13<sup>th</sup> January 2025.

| 3.0 | Finance and Resource Implications   |    |

|   |      |
| Lisburn & Castlereagh City Council  |      |

#### How to complete the consultation

The consultation consists of a series of questions. These are provided here in full and are also on citizen space.

The questions cover the type of public body the Commission should be, its composition, the Commission's role and legislated functions, the proposed sectors to be represented, its reporting arrangements and the secretariat and support required.

- Our key policy proposals are presented in the Summary at Part 1 of this document.
- The policy considerations behind these proposals and further detail on them is provided in Part 3 of this document.

#### **Consultation questions**

Q1. Do you agree with the proposal that the Commission should be established as an Advisory Non-Departmental Public Body with the chair and its members recruited in line with the guidance issued by the Commissioner for Public Appointments.

| Yes  | Yes |
|--|-----|
| No   |     |
| Unsure   |     |
| Please provide comments to support your answer |     |

#### Q2. Do you agree the Commission membership should be between 7-20 members?

| Yes                      |   |
|--------------------------|---|
| No                       |   |
| Ulisule                  | Unsure  |
| comments to support your | The Climate Change Act states that seven sectors must be represented on the Commission, these sectors, due to their size and impact may require multiple members to effectively represent the views across the sectors. |
|                          | The membership of the Commission should also have representatives from transport and energy sectors from the beginning and this membership should not be delayed while amendments are made to the Regulations.          |
|                          | The proposed membership is appropriate and consistent with the membership size of the Irish and Scottish Just Transition Commissions.   |

#### Q3. Do you agree the Commission membership should meet on average 15 days per year?

| Yes         |  |
|-------------|--|
| No          |  |
| Ulisuie     | Unsure   |
| comments to | The Commission's plan of action for the first term should determine the time commitment required. There should be flexibility around the time commitment to enable the Commission to fully carry out their role without being restricted by a time schedule. |
|             | The time commitment should be monitored and re-evaluated annually based on the work requirements of the Commission.  |

# Q4. Do you agree that the Commission should be similar to the Scottish model and supported by a small team to provide a secretariat function to allow the Commission to function effectively?

| Yes                                   | Yes   |
|---------------------------------------|---|
| No                                    |   |
| Unsure                                |   |
| comments to<br>support your<br>answer | As the Scottish model is considered to be successful, the secretariat support team for the NI Commission should be provided with the same adequate resources as the Scottish team, to include access to independent legal advice. We believe a small secretariat is essential to support the work of the Commission by assisting with research, decision-making, coordination, and the organisation of meetings and publications. |

### Q5. Do you agree that members appointed to the Commission should serve a term of 5 years?

| Yes         | Yes  |
|-------------|--|
| No          |  |
| Unsure      |  |
| comments to | Appointments to the Commission should follow CPANI guidance and is consistent with the terms of other Advisory Non-Departmental Public Bodies in Northern Ireland. |

## Q6. Do you agree that the Commission would fulfil the oversight function required of it in the Act by reviewing and reporting on the development and implementation of-

- any sectoral plan published under sections 13 to 21 of the Act;
- any climate action plan published under section 29 or 51 of the Act; and
- any scheme established by Regulations under section 31 of the Act.

| Yes  | Yes |
|--|-----|
| No   |     |
| Unsure   |     |
| Please<br>provide<br>comments to<br>support your<br>answer |     |

#### Q7. Do you agree that the Commission would be fulfilling its advice function by:

- Responding to a Northern Ireland department's request for advice within agreed timeframes.
- Issuing research and guidance documents for departments to review and consider when developing emission reduction policies.

| Yes  | Yes |
|--|-----|
| No   |     |
| Unsure   |     |
| Please provide comments to support your answer |     |

#### **Q8. Should the Commission include representation from the Transport sector?**

| Yes                    | Yes   |
|------------------------|---|
| No                     |   |
| Unsure                 |   |
| support your<br>answer | Transport is a significant contributor to GHG emissions in NI. Changes to domestic and commercial transport has the potential to impact on businesses and the public while reducing GHG emissions. Representatives from the transport sector (domestic and commercial) should be included in the Commission enabling a coordinated and equitable transition to sustainable transport solutions. |

#### Q9. Should the Commission include representation from the Energy sector?

| Yes                    | Yes   |
|------------------------|---|
| No                     |   |
| Unsure                 |   |
| support your<br>answer | The energy sector has a significant contribution to greenhouse gas emissions in Northern Ireland (14%). Representatives should be sought from the energy production, domestic/business energy use and renewables sectors. Energy changes have the potential to impact on households across Northern Ireland and views must be sought in terms of the impact on the public and those living in fuel poverty. A just transition in the energy sector involves decarbonising the sector while also improving people's quality of life and addressing inequalities. |

### Q10. Should the Commission include representation from the Financial/Green Finance sector?

| Yes                                   | Yes   |
|---------------------------------------|---|
| No                                    |   |
| Unsure                                |   |
| comments to<br>support your<br>answer | Financial investment is essential in all emissions reductions initiatives and to ensure a just transition for all. Representation should be sought from the (green) finance sector. Financing a Just Transition will take many forms, with measures ranging from the macro to the micro. The ability of government to borrow at a low cost over the very long-term means public finance will play a crucial role in funding a fair transition for workers, communities and consumers, ensuring the financial burden is shared equitably and is manageable.  Private finance can also help ensure a just transition by redirecting financial flows to green technologies, adaptation solutions, and innovative businesses. Financial institutions can support emission-intensive businesses to lower their emissions and provide communities with access to finance to invest in measures that will support the transition. The representative on the Commissions will therefore need to have a broad experience and knowledge of both public and private finance instruments. |

# Q11. Are there any other sectors in addition to the Transport, Energy, Finance and those listed in 37(4) of the Act that should be represented on the Commission – and if so, please provide reasons for your answer.

| Yes   | Yes  |
|---|--|
| No  |  |
| Unsure  |  |
| Please provide<br>comments to<br>support your<br>answer | The Commission should have members to represent communities and individuals impacted by the transition. These members may be included in ad—hoc advisory or working groups and may not be required in the core membership of the Commission.   |
|   | As the third highest emitting sector there should be representation from the building sector to provide expert knowledge on the transition of buildings and the impact of this transition.   |
|   | A sector-specific representative would provide expertise to inform strategies such as building energy performance, retrofitting, sustainable design and construction practices, and the decarbonisation of heating systems. We know that embodied carbon accounts for a large portion of a building's carbon footprint. A building expert's input would be critical in fostering innovation to reduce embodied carbon in building materials and enhance building and product life cycles. The representative should advocate for targeted, actionable measures tailored to industry needs. |

# Q12. Do you agree the Commission should have a power to establish Ad-Hoc Committees or working groups to secure additional knowledge or expertise that may not be available with the Commission.

| Yes  | Yes   |
|--|---|
| No   |   |
| Unsure   |   |
| Please provide comments to support your answer | Ad-Hoc Committees or working groups should be established when expert knowledge is required about a particular subject.  Scotland's Just Transition Commission ToR, indicates that working groups allow "members with specific interests and expertise an opportunity to work flexibly and drill down into detail as required," ensuring high-quality engagement, thorough scrutiny, and informed advice across the wide range of topics under the Commission's remit. These groups have been described as instrumental in supporting the Commission's work and ensuring its objectives are met effectively. It is therefore recommended to consider the objectives and operational principles outlined by the Scottish Just Transition Commission to enhance its functionality and impact. |

#### Q13. What do you think the key initial priorities should be for the Commission?

Please provide comments to support your answer

The Committee should prioritise action around the highest emitting sectors of agriculture, domestic transport, buildings and electricity supply. A collaborative approach should be taken to address the emissions in these sectors while considering the impacts on communities and individuals impacted by the transition.

14

Committee: Environment & Sustainability

Date: 9<sup>th</sup> January 2025

Report from: Head of Service – Building Control & Sustainability

**Item for:** Decision

**Subject:** Draft LCCC Sustainability Strategy and Climate Action Plan

#### **Background and Purpose of Report:**

- 1.1 Elected Members were provided with an update report on the progress of Sustainability at the September Environment & Sustainability Committee. Link attached for members referral: Environment and Sustainability Committee 2024-09-04 lisburncastlereagh.gov.uk
- 1.2 As part of that report, Officers informed the Elected Members that a Sustainability Strategy and Climate Action Plan were being developed for Council.
- 1.3 Council governance is such that any new Strategy is subject to gaining Elected Members approval before engaging with the public on a 12-week consultation process.
- 1.4 Members will find the draft LCCC Sustainability Strategy attached at **Appendix 2BC** and the Climate Action Plan attached at **Appendix 3BC**. The Equality Screening and Rural Needs Impact Assessment are attached at **Appendix 4BC** and **Appendix 5BC**.
- 1.5 The Sustainability Strategy and Climate Action Plan are presented to Members for comment, approval and for authority to move to the public consultation phase.

#### Sustainability Strategy:

1.9

- The Sustainability Strategy is set out to take readers on a journey of who we are, how climate change affects us, the risks, strategic context, legislative targets, NI emissions and our own Council emissions. It sets out what we are doing and what we plan to do through the Climate Action Plan.
- Council Officers recognise that the council is on a journey and is part of a wider collaborative drive to achieving Net Zero by 2050. On the 11<sup>th</sup> December 2024, the DAERA Minister made an announcement on the setting of the emissions target for 2040 and the first 3 carbon budgets for Northern Ireland: Muir welcomes Assembly approval of emissions targets | Department of Agriculture, Environment and Rural Affairs
- 1.8 This Strategy is a 3-year Strategy (2025-2028) that matches the Public Body Reporting Regulations cycle set by central government.
  - Key Vision & Aims for Council

On page 8 of the Strategy, Members will find the key vision and goals for Council:

- 1.10 Vision: A civic and inclusive leadership style working to embed and safeguard future social, economic, and environmental sustainability.
- 1.11 Goals:
  - Reducing energy consumption across council facilities
  - Exploring and progressing viable renewably generated energy sources
  - Training all staff and Elected Members in climate awareness
  - Becoming a civic leader by promoting sustainability and climate action
  - Protecting and enhancing native biodiversity
  - Promoting environmental protection
  - Developing a council policy to give sustainability direction to council services and functions
  - Developing and delivering a Climate Action Plan
  - Developing and delivering a Climate Adaptation Plan
- The Strategy and Climate Action Plan will be subject to annual reviews and updating as other influencing legislation such as central government Climate Action Plans, Carbon Budgets and Targets are agreed and developed.
- 1.13 Elected Members will find a 'walkthrough' digital presentation of the LCCC Sustainability Strategy and Climate Action Plan at : <a href="https://www.wevideo.com/view/3657303533">https://www.wevideo.com/view/3657303533</a>
- Should Elected Members agree to the Sustainability Strategy moving to the public consultation phase, Officers would be delighted for feedback and comment to be considered within the final Strategy.

#### **Climate Action Plan**

- The Climate Action Plan (CAP) has been developed to set out sustainable actions to be delivered by Council and assigned against lead Officers, for ownership. In depth consultation was held across teams to agree the actions contained within the CAP.
- The actions are categorised within the 6 Action Areas and given timelines for delivery. The CAP is developed as a 'living document' subject to change and update as the council grows in its understanding of our fair contribution, and collaborative approach with central government.
- The first iteration of the CAP is designed to measure a baseline in the first year, so no specific targets are set at this stage. Each of the actions within the CAP will be subject to monitoring, annual review and reporting.
- 1.18 Should Member agree to progress the Strategy and Climate Action Plan to Public Consultation, council Officers will arrange the relevant public awareness campaign along with launch details.

#### 2.0 **Recommendation**

It is recommended that the Environment & Sustainability Committee, subject to any comments, approves the draft LCCC Sustainability Strategy and Climate Action Plan to progress to public consultation stage.

| 3.0 | Finance and Resource Implications   |     |
|-----|---|-----|
|     | None for Council at this time.  |     |

### Introduction

Climate change, and its impact on the world we live in, is one of the most significant issues that we all face today. The effects of global warming are well-publicised, with local communities being impacted by weather extremes, resulting in heat stress, flooding, drought, increasing wildfires and freezing conditions. Expert evidence suggests that extreme weather events are going to happen more frequently in the future unless we take steps to address the underlying issues.

We all must act now to play our part to protect our environment for future generations. In response to the overwhelming scientific evidence and the increased frequency and severe weather events of a changing climate as the consequence of a warming planet, Lisburn & Castlereagh City Council passed a Notice of Motion declaring a Climate Emergency in 2021.

As a result, this Council resolved to establish and agree a Sustainability Strategy and Climate Action Plan that sets out our vision for a sustainable and resilient future with practical steps needed to minimise and mitigate against the impacts of climate change.

We therefore present the Lisburn & Castlereagh City Council Sustainability Strategy and Climate Action Plan. The development and delivery of which is cross-departmental and collaborative in its approach both internally and with wider central government to coordinate the shared drive to net zero.

The time for climate action is now and Lisburn & Castlereagh City Council is committed to achieving the goals set out within this Strategy.

### **Executive Summary**

This Sustainability Strategy and Climate Action Plan has been developed to outline Lisburn & Castlereagh City Council's (LCCC) response to the Climate Emergency and intends to:

- Create an evidence base, identifying how our climate is changing and the challenges and opportunities that we face using expert scientific information including the Climate Change Committee (CCC) progress reports 1
- Outline our goals and ambitions for mitigating Climate Change within the organisation
- Meet the requirements of the Climate Change Act (Northern Ireland) 2022 and
- The Climate Change (Reporting Bodies) Regulations (NI) 2024,
- Develop a high-level Climate Action Plan, setting out the critical actions needed to deliver our goals,

enabling us to mitigate against the impact of climate change, adapt and thrive.

The focus of the strategy is built around 6 key action areas with an overall goal to embed sustainability and climate action into council decisions and operations. The Strategy and Action Plan will focus on the functions and operations within the remit of the council with an ambition to reduce the council's climate impact.

LCCC has reviewed and prioritised current and future known climate impacts considering local and UK Government policy and legislative implications and identified a series of actions needed to minimise emissions and build resilience within each area of work.

Globally and locally, carbon emissions must be cut consistently year on year to halt global warming. By working together, we can make significant progress in delivering our goals for a brighter, cleaner, environment friendly future.

This Lisburn & Castlereagh City Council Sustainability Strategy and Climate Action Plan is the beginning of our journey towards that future. It is a living document and will evolve and develop as the Plan is delivered.

### **Targeted Action Areas**

Lisburn & Castlereagh Council (LCCC) has identified 6 internal action areas to target through its Sustainability Strategy and Climate Action Plan. The purpose of which is to understand our current position and to target the reduction of our

climate impact. They are:

Citizen engagement & leadership

How we engage and communicate with our citizens to promote and encourage a more sustainable way of living and working, leading by example as a sustainable organisation.

**Buildings** and energy

The energy we currently use within our estate and functions. the emissions produced from our facilities and the types of energy we will use in the future.

**Transport** 

The way we travel and the means we choose to make these journeys for business purposes and to deliver the operational functions of the council.

Waste and resource management

The way we manage our waste and resources from council facilities and operations.

**Economy** 

Our local economy, supply chains and supporting businesses.

**Natural** environment

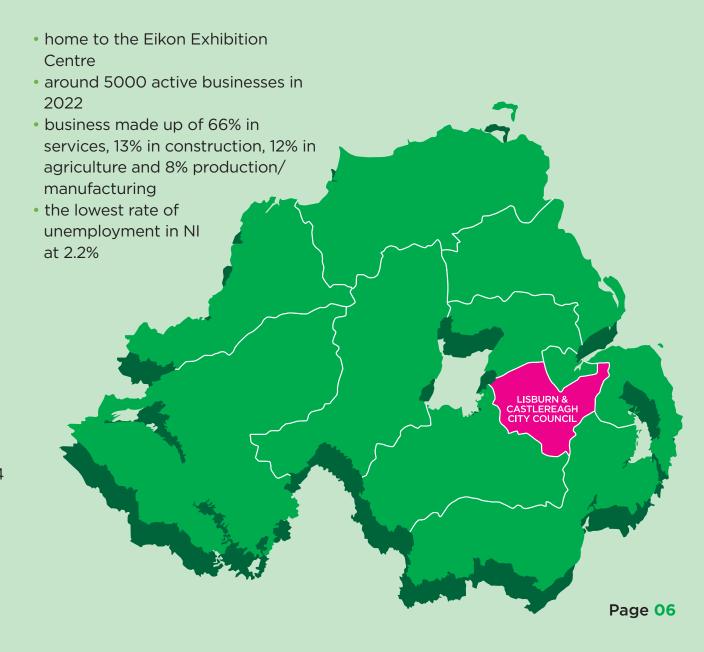

How we protect our natural environment and use it to reduce the impacts of climate change.

### **Council Area Profile**

Lisburn & Castlereagh City Council area stretches from the shores of Lough Neagh in the west to the hills above Dundonald in the east and from the Belfast Hills in the north to the Dromara Hills in the south. The area is characterised by the strong urban cores such as Lisburn and Dundonald with a diverse and rich rural hinterland of scenic landscapes and villages rich in heritage. Our council area is one of the fastest growing areas within NI.

#### **Key Statistics:**

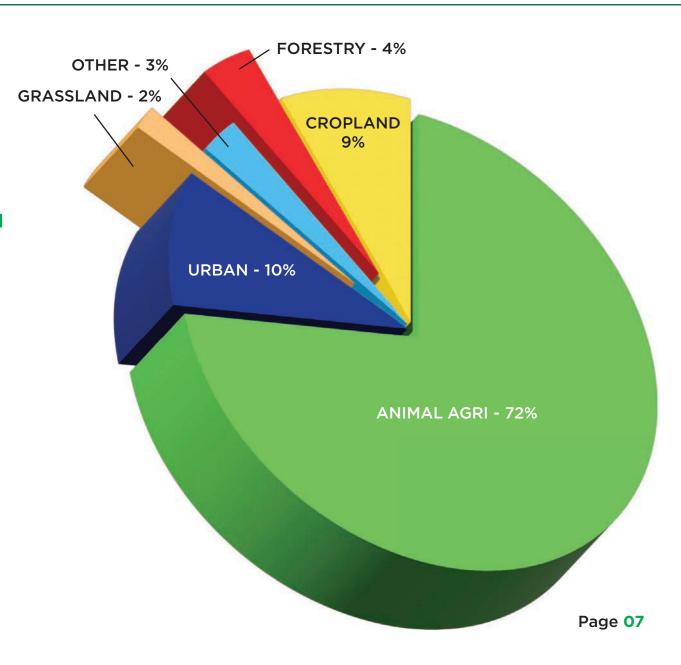

- an area of 504 km<sup>2</sup> (195 m<sup>2</sup>)
- a population of more than 150,000 (10.6% increase since 2011) and
- more than 60,000 households (12% increase since 2011)
- 19% of our population are aged 0-14 years old
- 40 Primary, 9 Post Primary and 5 Special Schools
- 3 Hospitals
- tourism offerings including Royal Hillsborough

The land use within Lisburn & Castlereagh City Council area is dominated by use associated with farming and agriculture with these areas making up 81% of the overall land use area total.

### Lisburn & Castlereagh City Council Area Land Use Breakdown:

Animal Agri 72%
Urban 10%
Cropland 9%
Forestry 4%
Other 3%
Grassland 2%

# Our Vision for Sustainability in Lisburn & Castlereagh City Council

A civic and inclusive leadership style working to embed and safeguard future social, economic, and environmental sustainability.

### **Our Goal for Lisburn & Castlereagh City Council**

#### Lisburn & Castlereagh City Council's goal is to become a net zero, resilient council by 2050.

LCCC will achieve this goal by:

- Reducing energy consumption across council facilities
- Exploring and progressing viable renewably generated energy sources
- Training all staff and Elected
   Members in climate awareness
- Becoming a civic leader by promoting sustainability and climate action
- Protecting and enhancing native biodiversity
- Promoting environmental protection
- Developing a council policy to give sustainability direction to council services and functions

- Developing and delivering a Climate Action Plan
- Developing and delivering a Climate Adaptation Plan

LCCC is committed to playing its part in a just transition to achieving Net Zero by 2050 and central government interim targets related to:

- Greenhouse gas emission reduction targets for 2030, 2040 and 2050 as set by DAERA.
- Collaboration with central government 'Sectoral Plans' and 'Carbon Budgets' as set by DAERA.

 Reporting local authority progress to DAERA in compliance with the Climate Change (Reporting Bodies) Regulations (NI) 2024

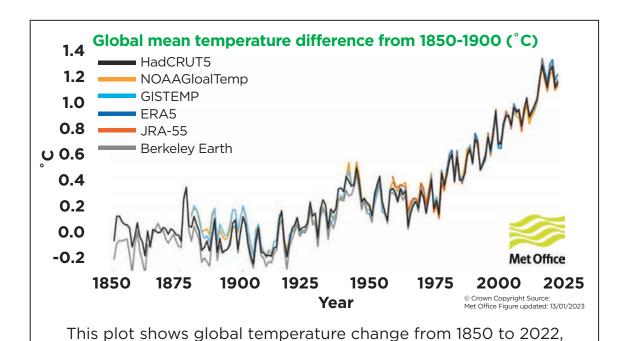

### **What is Climate Change?**

Climate change is the long-term shift in average weather patterns across the world. Since the mid-1800s, humans have contributed to the release of carbon dioxide and other greenhouse gases into the air causing global temperatures to rise, resulting in long-term changes to the climate.

Over the last decade, the world was on average around 1.2C warmer than during the late 19th Century with recent global temperatures exceeding a 1.5C rise (driven by human-caused climate change and boosted by the natural El Nino weather phenomenon) and 2023 being declared the hottest on record.

compared to an estimated 1850-1900 baseline average temperature.

### Human impact on climate change?

Whilst natural factors have influenced climate change across the Earth's history, natural causes cannot explain the particularly rapid warming seen in the last century. According to the UN's climate body, the IPCC this is mainly from the widespread use of fossil fuels, such as coal, oil and gas in homes, factories and transport.<sup>2</sup>

When fossil fuels burn, they release greenhouse gases, mostly carbon dioxide (CO<sup>2</sup>). This traps extra energy in the atmosphere near the Earth's surface, causing the planet to heat up.

### What are the effects of climate change so far?

The global average temperature increase of 1.2C in the past decade has resulted in:

- more frequent and intense extreme weather, such as heatwaves and heavy rainfall
- rapid melting of glaciers and ice sheets, contributing to sea-level rise
- huge declines in Arctic sea-ice
- · ocean warming.

#### Can there be further impacts?

According to the IPCC limiting long-term average global temperatures to a 1.5C rise is crucial. Any rise above this temperature will be the 'tipping point' where irreversible damage is likely to occur.

### What are governments doing about climate change?

In a landmark agreement signed in Paris in 2015, almost 200 countries pledged to try to keep global warming to 1.5C.

To achieve this, net zero CO<sup>2</sup> emissions should be reached by 2050. Net zero means reducing greenhouse gas emissions as much as possible and removing any remaining emissions from the atmosphere.

However, greenhouse gas levels are still rising quickly and the world is 'likely' to warm beyond 1.5C, according to the IPCC.

### Impacts and Risks of Climate Change on LCCC

The predicted climate change impacts on LCCC, based on UK and Northern Ireland information, forecast an increase in annual temperatures. Projections anticipate increased heavy summer rainfall events and wetter winters. Extreme weather events are predicted to become more frequent and intense, including flash flooding. <sup>3</sup>

### **Climate Change Risks**

The Met Office report 'UK Climate Projections Headline Findings, August 2022' <sup>4</sup>, estimates that in a high emission scenario <sup>5</sup> by 2070 Northern Ireland could see: If the climate changes as projected, there will be impact risks on all sectors of the LCCC area. This may include flash flooding affecting buildings and land, and river flooding. impacting on farming crops, food supply and biodiversity. These associated risks for Council will be captured in the LCCC Climate Adaptation Plan.

38% drier to 3% wetter summers

2% drier

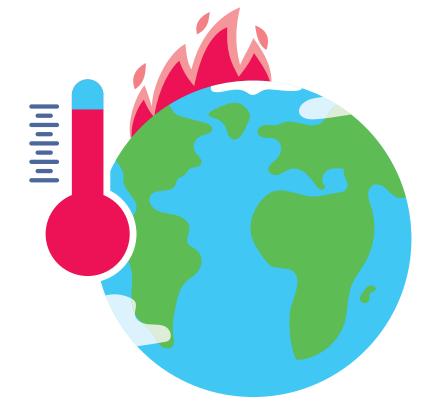

to 25% wetter

winters

0.8°C to 4.9°C warmer summers

0.0

0.6°C to 3.9°C warmer winters

<sup>4 (</sup>https://www.metoffice.gov.uk/binaries/content/assets/metofficegovuk/pdf/research/ukcp/ukcp18-infographic-headline-findings-land.pdf) estimates

<sup>&</sup>lt;sup>5</sup> Emissions scenario refers to the Representative Concentration Pathways (RCPs) used in climate models to describe possible futures based on assumptions about greenhouse gas emissions. In RCP2.6 global emissions are strongly mitigated and reduced and global temperature rise is kept below 2°C (low emissions scenario). In RCP8.5 global emissions grow unmitigated and global temperature rise exceeds 4°C (high emissions scenario).

### **Strategic Context and Legal Requirements**

In 2021, LCCC passed a Notice of Motion declaring a Climate Emergency. Since then the Council has committed to reducing its impact on the effects of Climate Change and has committed to developing a Sustainability Strategy and Climate Action Plan.

This position has developed and been directed by the relevant legislative frameworks:

| 2006 | <ul> <li>NI (Miscellaneous Provisions) Act 2006, Section 25 - states that 'A public authority must, in exercising its functions, act in the way it considers best calculated to contribute to the achievement of sustainable development in Northern Ireland'.</li> <li>NI Sustainable Development Strategy - presented the first steps towards tackling sustainable development challenges and aimed to achieve a better balance between social, environmental and economic progress.</li> </ul>           |
|------|---|
| 2008 | UK Climate Change Act (Amended 2019) - Established targets for the UK to achieve net zero emissions by 2050.  |
| 2014 | <ul> <li>The Local Government Act (Northern Ireland) 2014 - Section 84 Councils must make arrangements to secure continuous improvement in the exercise of their functions and must have regard in particular to the need to improve the exercise of its functions in terms of sustainability.</li> <li>Paris Climate Agreement - agreed to limit the increase of the global average temperature to 1.5°C above pre-industrial levels. NI Climate Change Adaptation Programme (NICCAP2) 2014-19.</li> </ul> |
| 2015 | <ul> <li>UN Sustainable Development Goals (2015).</li> <li>NI Climate Adaptation Programme (NICCAP2) 2019 - 24.</li> </ul>  |
| 2020 | NI Declares a Climate Emergency through a Notice of Motion carried by the Northern Ireland Assembly.  |
| 2021 | <ul> <li>Draft Green Growth Strategy for NI - The Executive long-term vision and framework for tackling the climate crisis, balancing our climate, environment and economy.</li> <li>LCCC declared a Climate Emergency with a Notice of Motion carried by Full Council.</li> </ul>  |
| 2022 | <ul> <li>NI Climate Change Act 2022 - sets a target of an at least 100% reduction in net zero greenhouse gas (GHG) emissions by 2050 for Northern Ireland compared to the 1990 baseline.</li> <li>Draft Environment Strategy for NI - sets out six strategic environmental outcomes as a guide to how we can preserve, protect and improve our environment.</li> </ul>  |
| 2023 | Draft Circular Economy Strategy - sets the DfE vision to create an innovative, inclusive and competitive economy, with responsible production and consumption at its core.  |
| 2024 | <ul> <li>NI Climate Change Adaptation Programme 2024-29 (NICCAP3).</li> <li>The Climate Change (Reporting Bodies) Regulations (Northern Ireland) 2024 sets dates for Mitigation and Adaptation Report submission and Public Body Reporting.</li> </ul>  |

### SUSTAINABLE GALS DEVELOPMENT

### **UN Sustainable Development Goals** (2015)

The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future.

At its heart are the 17 Sustainable Development Goals (SDGs), which are an urgent call for action by all countries - developed and developing - in a global partnership. It recognises that ending poverty and other deprivations must go hand-in-hand with strategies that improve health and education, reduce inequality, and spur economic growth - all while tackling climate change and working to preserve our oceans and forests.

#### **Pillars of Sustainability**

# **NI Climate Change Targets**

### NI Climate Change Act (2022)

The Climate Change Act (Northern Ireland) 2022 sets a target of an at least 100% reduction in net zero greenhouse gas (GHG) emissions by 2050 for Northern Ireland compared to the 1990 baseline, along with interim targets including at least 48% reduction in net GHG emissions by 2030. The Department for Agriculture, Environment and Rural Affairs (DAERA) must set updated 2030 and 2040 emissions reduction targets to ensure that they are in line with the 2050 net zero GHG emission target.

The Act also sets sectoral targets on Government Departments including 2030 targets of:

- Energy at least 80% of electricity consumption from renewable sources.
- Waste Management 70% of waste recycled, and
- Transport a target for a minimum spend of 10% of overall transport budgets on active travel,

 Other Sectoral Plans - include Agriculture, Industrial Process, Infrastructure and Fisheries.

### **Public Body Reporting**

There is a legal requirement on all Northern Ireland Government Departments to exercise their functions (as far as is possible to do so) in a manner consistent with the achievement of the targets of the Act and the carbon budgets set under it.

The Act required DAERA to make new regulations that sets a requirement for specified public bodies to report on climate change. These regulations known as The Climate Change (Reporting Bodies) Regulations (Northern Ireland) 2024 specify that the first mitigation reports are due to be submitted to DAERA by 31st October 2025 and then every 3 years after. As a public body LCCC will be required to report to DAERA under these regulations.

48% reduction in GHG emissions by 2030

Net zero carbon dioxide by 2050

80% electricity from renewables by 2030

Net zero emissions by 2050

### **Carbon Budgets**

A carbon budget is the maximum total amount of emissions permitted for a budgetary period

The Climate Change Act requires DAERA to make regulations that set Carbon Budgets for the 'net Northern Ireland emissions account' for each budgetary period. The first budgetary period is 2023-2027 and the subsequent budgetary periods will be every 5 years thereafter. The UK Climate Change Committee has provided advice on the Carbon Budget and DAERA is currently consulting on this advice with a view to setting the budget.

### **Climate Targets**

In March 2023 the CCC published the 'Advice Report; The Path to a Net Zero Northern Ireland' 4.

"This report provides advice to Northern Ireland on its 2030 and 2040 interim targets and first three Carbon Budgets. The advised targets and Carbon Budgets are consistent with the decarbonisation required for Northern Ireland to meet its legislated 2050 Net Zero target."

The CCC concluded, that targets consistent with the legislated Net Zero target for NI are:

- The first Carbon Budget (2023-2027) to be set at levels that have average annual reductions of 33% on 1990 levels
- The second Carbon Budget (2028-2032) to be set at levels that have average annual reductions of 48% on 1990 levels, and

 The third Carbon Budget (2033-2037) to be set at levels that have average annual reductions of 62% on 1990 levels.

The Climate Change Act (NI) 2022 requires the Department (DAERA) to obtain advice and recommendations from the Committee on Climate Change (CCC) amongst others.

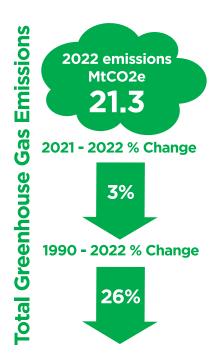

# **Greenhouse Gas Emissions**

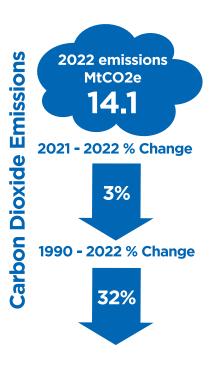

#### **UK and NI emissions**

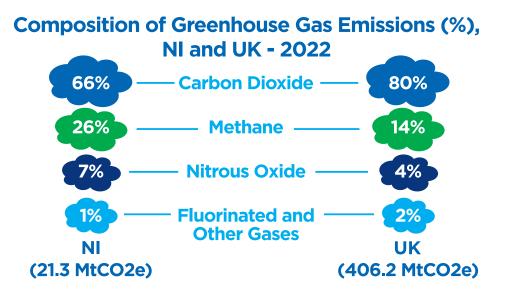

In 2022 carbon dioxide, methane and nitrous oxide collectively accounted for an estimated 98% of greenhouse gas emissions in the UK, with fluorinated gases making up the remaining 2%.

At that time, in Northern Ireland, 99% of GHGs were from carbon dioxide, methane and nitrous oxide with a higher percentage attributed to methane here than in the rest of the UK.

Emissions across Northern Ireland have reduced by 26% since the 1990 baseline. In order to be on track to reach the targets set out in the NI Climate Change Act Northern Ireland needs to reduce a further 22% reduction in emissions in the next eight years from the 2022 measured levels.

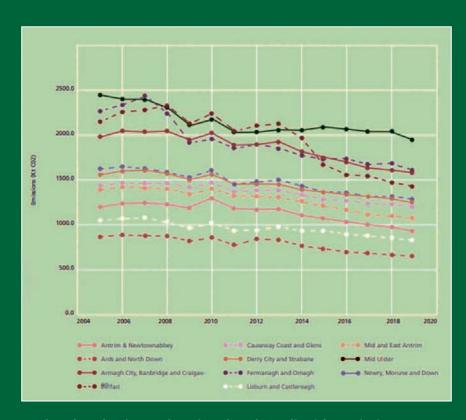

#### LCCC area GHG emissions

Since 2000, the LCCC area has reduced emissions by 42% through a combination of an increasingly decarbonised electricity supply, structural change in the economy and gradual adoption of more efficient buildings, vehicles and businesses. Baseline emissions for the LCCC area are projected to fall by 59% between 2000 and 2050 by investing further in energy and fuel efficiency systems. (source: A summary carbon roadmap for LCCC, University of Leeds, 2022).

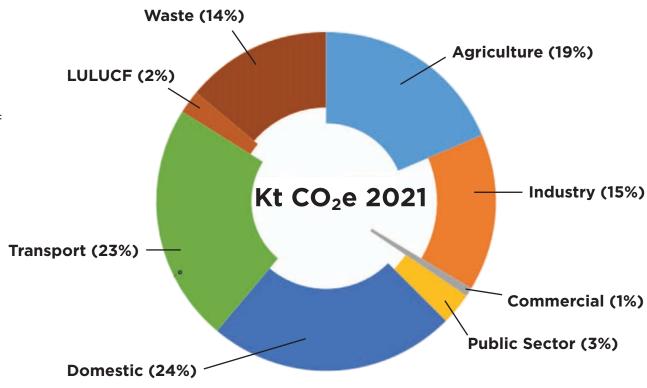

UK local authority and regional carbon dioxide emissions national statistics: 2005-2019 (Department for Business, Energy & Industrial strategy

#### LCCC area emissions 2021

The local data for the LCCC area has been extracted from the 2021 UK Local Authority GHG Emissions (UK LA GHG Emissions) database published by the Department for Business, Energy and Industrial Strategy (BEIS). It is a combination of the UK's Greenhouse Gas Inventory with data from several other sources, including local energy consumption statistics, to produce a nationally consistent set of greenhouse emissions estimates at the local authority level from 2005 to 2021.

The grand total of emissions in the LCCC area in 2021 indicates that LCCC area needs to remove at least 1297kt CO2e of GHG emissions to support the NI Climate Change Act target on net zero by 2050.

## 2021 emissions in the LCCC area by sector

LCCC needs to remove at least 1297kt CO2e of GHG emissions to support the NI Climate Change Act target on net zero by 2050.

# **Council Emissions from Operations and Functions**

In order for the Council to benchmark and track its progress in meeting the Climate challenge, it must first understand what its current Greenhouse Gas (GHG) emissions are.

In 2024 the Council carried out a GHG emissions exercise to identify the Scope 1 and Scope 2 emissions baseline for council facilities.

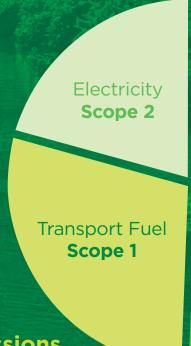

Our carbon footprint for 2023-2024 was measured at 6087.74 tCO2e (scope 1 and 2).

The Council will be tracking its Scope 1 and Scope 2 emissions on an annual basis and will be working to understand its Scope 3 emissions in the coming years.

| No. of the State o | <b>GHG Emissions</b> |
|--|----------------------|
| Fossil Fuels - Scope 1   | 3,082.49 tCO2e       |
| Transport Fuel - Scope 1*  | 1,746.04 tCO2e       |
| Electricity - Scope 2  | 1,259.21 tCO2e       |
| Total Scope 1 & 2  | 6,087.74 tCO2e       |

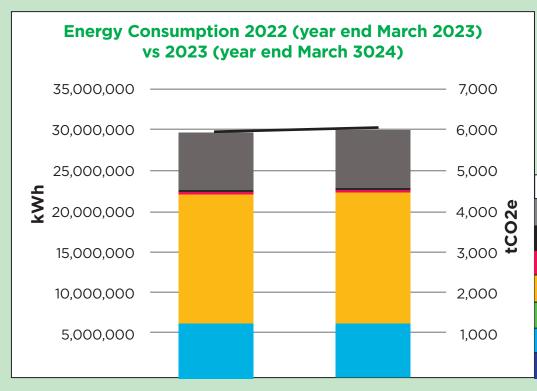

\* Assumed that transport fuel is split 50% DERV, 50% Gas Oil.

**Note:** Figures based on scope 1 and 2 emissions produced from 45 council facilities. Fugitive gases have not been included in the GHG emissions data at this time.

Fossil Fuels
Scope 1

**LCCC Emissions** 

|                      | 2022       | 2023       |
|----------------------|------------|------------|
| Transport Fuel (kWh) | 6,507,810  | 6,995,470  |
| Kerosene Oil (kWh)   | 59,601     | 43,141     |
| LPG (kWh)            | 496,900    | 485,569    |
| Natural Gas (kWh)    | 16,135,999 | 16,224,828 |
| Renewable (kWh)      | 69,132     | 48,832     |
| Main Electric (kWh)  | 6,158,485  | 6,080,972  |
| Emissions (tCO2e)    | 5,887      | 6,088      |

Baselining of carbon emissions was carried out on 45 Council buildings, the top 5 energy consumption facilities and their associated emissions are as follows:

| Lagan Valley LeisurePlex           |          |       | % of Total Scope 1 & 2 | % of Site Scope 1 & 2 |
|------------------------------------|----------|-------|------------------------|-----------------------|
| Fossil Fuels - Scope 1             | 1670.98  | tCO2e | 27.4%                  | 85.4%                 |
| Electricity - Scope 2 286.20 tCO2e |          | 4.7%  | 14.6%                  |                       |
| Total                              | 1,957.18 | tCO2e |                        |                       |

| Lough Moss Leisure Centre                 |        |       | % of Total Scope 1 & 2 | % of Site Scope 1 & 2 |

## **Definitions**

#### **Scope 1 Emissions**

Emissions come from fuel (petrol, diesel or gas) that is directly used within an area or from other sources such as landfill or industry within the area.

## **Scope 2 Emissions**

Emissions come from electricity used within an area

#### **Scope 3 Emissions**

Emissions are associated with goods and services that are produced elsewhere but imported and consumed within the area.

To mitigate against the projected climate changes and associated risks, and to meet targeted reductions within the Climate Change Act, LCCC must take action to reduce emissions immediately.

# What is the Council Doing?

In September 2021 LCCC declared a Climate Emergency with the following Notice of Motion carried by Full Council:

"This council notes with concern the findings of the IPCC (2021) report regarding climate change. This latest report shows the science on climate change is clear and the climate emergency is real. We as a council therefore resolve to play our part and do what we can to work towards the targets set by the governments of the UK and Ireland of net zero carbon emissions and declare that this is a climate emergency".

In order to be best placed to challenge the effects of climate change LCCC will develop action plans with two approaches:

- Climate Change Mitigation –
  working to remove and preventing
  the causes of further climate
  change, where possible. This
  Sustainability Strategy and
  Climate Action Plan will outline the
  council's proposed and ongoing
  mitigation measures.
- 2. Climate Change Adaptation planning and responding to the impacts and risks associated with the current changes to our climate. A Climate Adaptation Plan will be produced by LCCC to enable the council to build resilience and adapt to current and future climate change.

The two documents will be intrinsically linked with a purpose to:

 Set out the Council's commitment to our environment, society and economy by addressing climate change.

- Help its employees and the local community to understand and effectively respond to climate change impacts.
- Help to transition to a low-carbon, competitive and just economy at local, regional and national levels.
- Ensure LCCC is making its fair contribution towards national and global climate targets under the Paris Agreement, Climate Change Act and the Sustainable Development Goals.
- Position the area on the map for green investment.
- Demonstrate climate leadership as a responsible and fair Council.
- Ensure that the benefits of climate action are equitably distributed.
- Create a framework to measure, monitor and reduce emissions

Sustainability and Climate Action is embedded into the culture of LCCC through the councils Strategic Plans.

### Community Plan (2017-32)

community\_plan\_2017-2032\_email-pdf\_(lisburncastlereagh.gov.uk)

#### Local Development Plan 2032

local\_development\_plan\_2032\_-\_part\_1\_plan\_strategy\_(lisburncastlereagh.gov.uk)

#### **Corporate Plan (2024-2028)**

lccc-corporate-plan-2024-2028-web\_(lisburncastlereagh.gov.uk)

# What Have We Done So Far and What Are We Going To Do?

Whilst the preparation and development of the strategy documents has been ongoing, Council service units have not stood still in progressing with actions that will mitigate or adapt to Climate Change.

#### **Examples of these are:**

- 1. Local Biodiversity Action Plan
- 2. Local Development Plan
- **3. Performance Improvement Plan**
- 4. Tree and Woodland Strategy
- 5. Internal Waste Management Plan
- 6. Open Spaces Strategy

# **LCCC Climate Action Plan**

LCCC has developed a Climate Action Plan (CAP) appendix 1 that sets out the steps to be taken by Council that will guide all council service unit actions towards the goal of becoming a net zero, resilient council by 2050.

An evidence-based process has been followed to produce the CAP in which an assessment of existing data, policies, programmes, commitments and strategic priorities (at local and national levels) was carried out. This was followed by evidence gathering for quantitative and qualitative assessment and modelling to build a strong evidence-based action plan. Council officers have identified, prioritised and refined climate action for the CAP through a series of workshops and technical meetings since May 2022.

The Climate Action Plan is a live document and will be reviewed, updated and reported on annually. This annual assessment will enable the Council to monitor progress and adapt or amend actions where appropriate to ensure continual progression towards the interim and eventual 2050 targets on net zero. Actions have been cross referenced against the Council's Community Plan, Local Development Plan and Corporate Plan, they are presented as a high level summary in the Climate Action Plan attached.

# **Monitoring and Evaluation**

The Sustainability Strategy and Climate Action Plan is a live document that will be reviewed, updated and reported on annually.

Annual reporting will be made to Elected Members through an annual progress report which will be made publicly available on the council's website, a paper copy can also be supplied when requested. Annual assessment will enable LCCC to monitor progress and adapt or amend actions were appropriate.

Lisburn & Castlereagh City Council will remain open and transparent on its progression towards its goal of net zero by 2050.

# **Glossary of Terms**

#### CCC

The Climate Change Committee, which advises the government on emissions targets and reports to Parliament on progress made in reducing greenhouse gas emissions.

#### **CLIMATE ADAPTATION**

Refers to the actions, strategies, and measures taken to reduce the vulnerability of ecosystems, communities, and individuals to the current and anticipated impacts of climate change. It involves adjusting and preparing for the changing climate conditions to minimise the adverse effects on people, property, and the environment.

#### **CLIMATE MITIGATION**

Refers to efforts to reduce or prevent the emission of greenhouse gases (GHGs) into the atmosphere to limit global warming and its associated impacts. Mitigation strategies aim to lower the drivers of climate change, primarily through reducing GHG emissions and enhancing carbon sequestration.

#### CO<sup>2</sup>e - CO<sup>2</sup> EQUIVALENT

This is a metric measuring all greenhouse gases, including carbon dioxide, methane, and nitrous oxide, allowing them to be expressed as a single number for simplicity.

#### **DAERA**

Department of Agriculture, Environment and Rural Affairs.

#### DfE

Department for Economy.

### **EL NIÑO**

El Niño is a naturally occurring climate pattern associated with warming of the ocean surface temperatures in the central and eastern tropical Pacific Ocean. It significantly influences weather patterns, ocean conditions, and marine fisheries worldwide. El Niño occurs on average every 2-7 years.

#### **GREENHOUSE GAS (GHG)**

These are the gases in the that raise the surface temperature of our planet contributing to the greenhouse effect. These Gases include carbon dioxide, methane, nitrous oxide and fluorinated gases.

#### **IPCC**

Intergovernmental Panel on Climate Change - the UN's climate body established in 1988 to advance scientific knowledge about climate change caused by human activities.

#### **MITIGATE**

to make something less harmful, unpleasant, or bad.

#### **NET ZERO**

Net zero means no longer adding to the total amount of greenhouse gases in the atmosphere.

#### **NICCAP**

NI Climate Change Adaptation Programme.

#### **SCOPE 1 EMISSIONS**

These are the Green House Gas (GHG) emissions that a company makes directly, for example while running its boilers to heat a building or using petrol or diesel to power vehicles.

#### **SCOPE 2 EMISSIONS**

These are the emissions being produced from electricity use and electricity production.

#### **SCOPE 3 EMISSIONS**

Scope 3 emissions are all indirect emissions, not included in Scope 2, that occur in the value chain of the Councils activities. Examples are business travel, employee commuting, waste generation, purchasing of goods and services etc.

# UN SUSTAINABLE DEVELOPMENT GOALS (SDGs)

The Sustainable Development Goals (SDGs) are 17 global goals set by the United Nations in 2015, and adopted by 193 countries, to address major challenges like poverty, inequality, climate change, environmental degradation, peace, and justice. They aim to create a better and more sustainable world by 2030.

# **Climate Change Action Plan**

Lisburn & Castlereagh City Council has developed a Climate Action Plan (CAP) that sets out the steps to be taken by Council that will guide all council service unit actions towards the goal of becoming a net zero, resilient council by 2050.

Council Officers have identified, prioritised and refined climate actions for the CAP through a series of workshops and technical meetings since May 2022.

Actions have been cross referenced against the Council's Community Plan, Local Development Plan and Corporate Plan and have been set out under six action areas identified in LCCCs Sustainability Strategy.

# **Action Areas**

# 1. Citizen engagement and leadership

How we engage and communicate with our citizens to promote and encourage a more sustainable way of living and working, leading by example as a sustainable organisation.

## 2. Buildings and energy

The energy we currently use within our estate and functions, the emissions produced from our facilities and the types of energy we will use in the future.

## 3. Transport

The way we travel and the means we choose to make these journeys for business purposes and to deliver the operational functions of the council.

# 4. Economy

Our local economy, supply chains and supporting businesses.

## 5. Waste and resource management

The way we manage our waste and resources from council facilities and operations.

### 6. Natural environment

How we protect our natural environment and use it to reduce the impacts of climate change.

The Climate Action Plan is a live document and will be reviewed, updated and reported on annually. This annual assessment will enable the Council to monitor progress and adapt or amend actions where appropriate to ensure continual advances towards the interim and eventual 2050 targets on net zero.

# 1. Citizen engagement and leadership

How we engage and communicate with our citizens to promote and encourage a more sustainable way of living and working, leading by example as a sustainable organisation.

### **Lisburn & Castlereagh City Council**

## **Section 75 Equality and Good Relations Screening template** (Oct 2022)

### Part 1. Information about the activity/policy/project being screened

Sustainability Strategy and Climate Action Plan providing a Strategic context to how Council will address Climate Change through climate mitigation across the LCCC estate.

### Name of the activity/policy/project

LCCC Sustainability Strategy & Climate Action Plan

Is this activity/policy/project – an existing one, a revised one, a new one?

This is a new strategy and plan

# What are the intended aims/outcomes the activity/policy/project is trying to achieve?

The strategy set out LCCCs vision and goals in terms of sustainability and intends to

- Create an evidence base, identifying how our climate is changing and the challenges and opportunities that we face using expert scientific information including the Climate Change Committee (CCC) progress reports,
- Outline our goals and ambitions for mitigating Climate Change within the organisation,
- Meet the requirements of the Climate Change Act (Northern Ireland) 2022
   and
- The Climate Change (Reporting Bodies) Regulations (NI) 2024,
- Develop a high-level Climate Action Plan, setting out the critical actions needed to deliver our goals, enabling us to mitigate against the impact of climate change, adapt and thrive.

Who is the activity/policy/project targeted at and who will benefit? Are there any expected benefits for specific Section 75 categories/groups from this activity/policy/project? If so, please explain.

The strategy is based on internal operations and will benefit all residents by reducing greenhouse gas emissions from council services and functions, however, there are no expected benefits for any specific Section 75 categories or groups.

Who initiated or developed the activity/policy/project?

**Building control and Sustainability** 

Who owns and who implements the activity/policy/project?

**LCCC** 

Are there any factors which could contribute to/detract from the intended aim/outcome of the activity/policy/project?

Yes

If yes, give brief details of any significant factors.

Resourcing

Resource and priority implications may impact on the type or number of climate actions that can be carried out by council.

Who are the internal and external stakeholders (actual or potential) that the activity/policy/project will impact upon? Delete if not applicable

**Staff** - The Sustainability Strategy and Climate Action Plan identifies work streams already underway or planned and sets new actions such as communications and training to begin to address the councils climate impact. This will result in new training modules for staff to participate in. Staff will drive the implementation of the Strategy and deliver the Actions within the CAP.

**Service users** Actions within the Climate Action Plan may lead to measures in council facilities and fleet to reduce the councils GHG emissions, however this will not impact on the level of service received by citizens. Should any notable specific actions or projects be developed as a result of the implementation of the Strategy and CAP then a further equality screenings will be completed by relevant teams or departments as appropriate for that specific project as required.

## Other public sector/voluntary/community organisations or trade unions

The sustainability Strategy and Climate Action Plan in an inward-looking document focusing initially on council functions and operations and should not impact on other public sector/voluntary/community organisations or trade unions.

#### Other

Elected Members will participate in new training modules regarding sustainability and the actions that can be taken to reduce climate impacts.

### Other policies/strategies/plans with a bearing on this activity/policy/project

| Name of policy/strategy/plan | Who owns or implements? |
|------------------------------|-------------------------|
| Corporate Plan 2024 -2028    | LCCC                    |
| Local Development Plan 2032  | LCCC                    |
| Community Plan 2017 - 2032   | LCCC                    |
| Green Growth Strategy        | DAERA                   |
| NI Climate Action Plan       | DAERA                   |
| Sectoral Plans               | DAERA / Dfl / DfE       |
| Climate Change Act           | DAERA                   |
| Public Body Reporting Regs   | DAERA                   |

### **Available evidence**

What evidence/information (qualitative and quantitative) have you gathered or considered to inform this activity/policy? Specify details for each Section 75 category.

Most up to date NISRA population data from Census 2021 (published 22/09/22) <u>Lisburn and Castlereagh Census Data</u>

| Section 75 Category | Details of evidence/information  |
|---------------------|--|
| Section 75 category |  |
| Religious Belief    | Using 2021 Census data indicates that 27% of the LCCC population were brought up in the Catholic religion while 58% were brought up in the Protestant & Other Christian religion.  No equality issues have been identified specific to this category |
| Political Opinion   | The majority political opinion locally would be Unionist.  |
|                     | No equality issues have been identified specific to this category  |
| Racial Group        | Latest 2021 Census data suggests 3.9% of LCCC residents are non-White (slightly higher than NI average) with 3.36% speakers of languages other than English.   |
|                     | Some citizens may require the Sustainability<br>Strategy and Climate Action Plan in and<br>alternative language, the documents will be<br>published on the council website which has a<br>translation facility.                                      |
| Age                 | The LCCC population at the time of the 2021<br>Census was 149,106 (an increase of 10.6% since<br>the 2011 Census). This can be noted in broad age<br>bands as follows:   |
|                     | 0-14 years 19%   |

|                       | 15-39 years 30%  |
|-----------------------|--|
|                       | 40-64 years 33%  |
|                       | 65+ years 18%.   |
|                       | NISRA Statistical Bulletin, 26 March 2015 shows a projected change in population aged 65 and over between 2012 and 2037 of 90.2%.  |
| Marital Status        | For the 16+ population in relation to marital and civil partnerships, Census 2011 data: 30.65% single; 53.78% married; 0.10% same sex partnership; 3.27% separated; 5.52% divorced; 6.68% widowed.       |
|                       | No equality issues have been identified specific to this category.   |
| Sexual Orientation    | No information is available on sexual orientation of LCCC population – official estimates for general population range from 1.2% to 4% with support groups claiming this is a significant underestimate. |
|                       | No equality issues have been identified specific to this category  |
| Men & Women Generally | From the 2021 census the LCCC population was 51% female and 49% male.  |
|                       | No equality issues have been identified specific to this category.   |
| Disability            | Census data 2021 suggests that 21.7% of the LCCC population have a long-term health problem or disability. This is a 3.4% increase on the Census 2011 figure.  |
|                       | Potential equality issues have been identified in relation to individuals with a disability as follows:  |
|                       | <ul> <li>blind and partially sighted people who are<br/>unable to read standard information may</li> </ul>   |

|                         | experience difficulties reading the councils Sustainability Strategy and Climate Action Plan. The documents will be published on the council website which has functionality to read documents aloud. |
|-------------------------|---|
| People with and without | Dependants would generally cover the following:   |
| Dependants              | The care of a child or children;  |
|                         | Caring for an elderly relative/person;  |
|                         | Caring for someone with a disability.   |
|                         | 2021 Census data on household size indicated a breakdown of the 60,147 households as follows:   |
|                         | 1 person 28%  |
|                         | 2 people 33%  |
|                         | 3 people 16%  |
|                         | 4 people 15%  |
|                         | 5 or more people 8%.  |
|                         | No equality issues have been identified specific to this category.  |

#### Staff

Information in relation to staff and section 75 categories. (This information is not complete at present, the introduction of a new HR system will assist with this data collection and the screening can be updated accordingly.)

| Section 75<br>Category | Details of evidence/info  | ormation               |         |

#### Needs, experiences and priorities

Taking into account the information referred to above, what are the different needs, experiences and priorities of each of the following categories, in relation to the particular activity/policy/decision? Specify details for each of the Section 75 categories

| Section 75 Category                | Details of needs/experiences/priorities  |
|------------------------------------|--|
| Religious Belief                   | No different needs identified by religious belief.   |
| Political Opinion                  | No different needs identified by political opinion   |
| Racial Group                       | Possible requirement for Strategy to be made available in alternative languages, this can be facilitated by software on the council website. |
| Age                                | No different needs identified by age   |
| Marital Status                     | No different needs identified by marital status  |
| Sexual Orientation                 | No different needs identified by sexual orientation  |
| Men & Women Generally              | No different needs identified for men and women generally  |
| Disability                         | Possible requirement for Strategy to be made available in alternative formats, this can be facilitated by software on the council website.   |
| People with and without Dependants | No different needs identified for people with and without dependants   |

#### Part 2. Screening questions

1 What is the likely impact on equality of opportunity for those affected by this activity/policy, for each of the Section 75 equality categories?

| Section 75 Category                | Details of likely impact – will it be positive or negative? If none anticipated, say none | Level of impact -<br>major or minor* - see<br>guidance below |
|------------------------------------|---|--|
| Religious Belief                   | No impact identified  |  |
| Political Opinion                  | No impact identified  |  |
| Racial Group                       | No impact identified  |  |
| Age                                | No impact identified  |  |
| Marital Status                     | No impact identified  |  |
| Sexual Orientation                 | No impact identified  |  |
| Men & Women Generally              | No impact identified  |  |
| Disability                         | No impact identified  |  |
| People with and without Dependants | No impact identified  |  |

<sup>\*</sup> See Appendix 1 for details.

### 2(a) Are there opportunities to better promote equality of opportunity for people within the Section 75 equality categories?

| Section 75 Category | IF Yes, provide details | If No, provide details          |
|---------------------|-------------------------|---------------------------------|
| Religious Belief    | • •                     | n relation to this strategy for |
| Political Opinion   | any of these groups.    |                                 |
| Racial Group        |                         |                                 |
| Age                 |                         |                                 |
| Marital Status      |                         |                                 |

| Sexual Orientation                 |
|------------------------------------|
| Men & Women Generally              |
| Disability                         |
| People with and without Dependants |
| •                                  |

#### **Equality Action Plan 2021-2025**

Does the activity/policy/project being screened relate to an action in the <u>Equality</u> Action Plan 2021-2025? No

#### 2(b) DDA Disability Duties (see Disability Action Plan 2021-2025)

Does this policy/activity present opportunities to contribute to the actions in our <u>Disability Action Plan</u>:

- to promote positive attitudes towards disabled people?
- to encourage the participation of disabled people in public life?

No

3 To what extent is the activity/policy/project likely to impact on good relations between people of different religious belief, political opinion or racial group?

| Good Relations<br>Category | <b>Details of likely impact. Will it be positive or negative?</b> [if no specific impact identified, say none] | Level of impact – minor/major* |
|----------------------------|--|--------------------------------|
| Religious Belief           | None   |                                |
| Political Opinion          | None   |                                |
| Racial Group               | None   |                                |

<sup>\*</sup>See Appendix 1 for details.

### 4 Are there opportunities to better promote good relations between people of different religious belief, political opinion or racial group?

| Good Relations<br>Category | IF Yes, provide details | If No, provide details      |
|----------------------------|-------------------------|-----------------------------|
| Religious Belief           |                         | No opportunities identified |
| Political Opinion          |                         | No opportunities identified |
| Racial Group               |                         | No opportunities identified |

#### **Multiple identity**

Provide details of any data on the impact of the activity/policy/project on people with multiple identities. Specify relevant Section 75 categories concerned.

LCCC recognises that all individuals are not exclusive to just one designated group. Multiple identity has been given consideration within this screening exercise to ensure benefit to all groups, however no direct impact has been identified at this time.

#### Part 3. Screening decision/outcome

Equality and good relations screening is used to identify whether there is a need to carry out a **full equality impact assessment** on a proposed policy or project. There are 3 possible outcomes:

- 1) **Screen out** no need for a full equality impact assessment and no mitigations required because no relevance to equality, no negative impacts identified or only very minor positive impacts for all groups. This may be the case for a purely technical policy for example.
- 2) **Screen out with mitigation** no need for a full equality impact assessment but some minor potential impacts or opportunities to better promote equality and/or good relations identified, so mitigations appropriate. Much of our activity will probably fall into this category.
- 3) Screen in for full equality impact assessment potential for significant and/or potentially negative impact identified for one or more groups so proposal requires a more detailed impact assessment. [See Equality Commission guidance on justifying a screening decision.]

**Choose only one of these** and provide reasons for your decision and ensure evidence is noted/referenced for any decision reached.

| Screening Decision/Outcome   | Reasons/Evidence  |
|--|---|
| Option 1   |   |
| Screen out – no equality impact assessment and no mitigation required [go to Monitoring section]   |   |
| Option 2   | Screen out with mitigation.   |
| Screen out with mitigation – some potential impacts identified but they can be addressed with appropriate mitigation or some opportunities to better promote equality and/or good relations identified [complete mitigation section below] | It is recognised that some section 75 groups may require the Sustainability Strategy and Climate Action Plan in alternative formats or languages but this will be facilitated if requested. |
| Option 3   |   |

Screen in for a full Equality Impact
Assessment (EQIA)

[If option 3, complete timetabling and prioritising section below]

#### Mitigation (Only relevant to Option 2)

Can the activity/policy/project plan be amended or an alternative activity/policy introduced to better promote equality of opportunity and/or good relations?

If so, give the **reasons** to support your decision, together with the proposed changes/amendments or alternative activity/policy and ensure the mitigations are included in a revised/updated policy or plan.

The purpose and main ambition of the Strategy and CAP is to reduce greenhouse gas emissions from council functions. To enable this ambition the documents set out the councils objectives and practical steps to be taken through the Climate Action Plan. The focus remains on GHG reduction, internally focused initially. As stated earlier any specific project that develops further as a result of the Strategy and CAP will be subject to its own specific Equality Screening.

The strategy cannot be amended to better promote equality however equality issues will be addressed through the provision of the Strategy in alternative formats or languages when required.

#### Timetabling and prioritising for full EQIA (only relevant to Option 3)

If the activity/policy has been 'screened in' for full equality impact assessment, give details of any factors to be considered and the next steps for progressing the EQIA, including a proposed timetable.

Is the activity/policy affected by timetables established by other relevant public authorities? Yes/No. If yes, please provide details.

#### Not applicable

#### Part 4. Monitoring

#### 2) monitoring by equality category.

#### **Example 1 - Council funding programme for community groups.**

Public authorities should consider the guidance contained in the Commission's Monitoring Guidance for Use by Public Authorities (July 2007).

Effective monitoring will help a public authority identify any future adverse impact arising from the activity/policy which may lead the public authority to conduct an equality impact assessment, as well as help with future planning and activity/policy development.

What will be monitored and how? What specific equality monitoring will be done? Who will undertake and sign-off the monitoring of this activity/policy and on what frequency? Please give details:

Public consultation will be carried out on the document in 2024/2025, a specific equality question will be included to ensure the document is suitable for all groups, a copy of the screening will be provided to consultees and updated if required.

#### Part 5 - Approval and authorisation

|              | Position/Job Title                      | Date       |
|--------------|---|------------|
| Screened by: | Gemma Richardson Sustainability Manager | 04/11/2024 |
| Reviewed by: | Annie Wilson<br>Equality Officer        | 14/11/2024 |
| Approved by: | C Duff<br>Head of Service               | 15/11/2024 |

Note: On completion of the screening exercise, a copy of the completed Screening Report should be:

- approved and 'signed off' by a senior manager responsible for the activity/policy
- included with Committee reports, as appropriate
- sent to the Equality Officer for the quarterly screening report to consultees, internal reporting and publishing on the LCCC website
- shared with relevant colleagues
- made available to the public on request.

Evidence and documents referenced in the screening report should also be available if requested.

#### Appendix 1 – Equality Commission guidance on equality impact

#### \*Major impact:

- a) The policy/project is significant in terms of its strategic importance;
- b) Potential equality matters are unknown, because, for example, there is insufficient data upon which to make an assessment or because they are complex, and it would be appropriate to conduct an equality impact assessment in order to better assess them;
- c) Potential equality and/or good relations impacts are likely to be adverse or are likely to be experienced disproportionately by groups of people including those who are marginalised or disadvantaged;
- d) Further assessment offers a valuable way to examine the evidence and develop recommendations in respect of a policy about which there are concerns amongst affected individuals and representative groups, for example in respect of multiple identities;
- e) The policy is likely to be challenged by way of judicial review;
- f) The policy is significant in terms of expenditure.

#### Minor impact

- a) The policy is not unlawfully discriminatory and any residual potential impacts on people are judged to be negligible;
- b) The policy, or certain proposals within it, are potentially unlawfully discriminatory, but this possibility can readily and easily be eliminated by

- 80
- making appropriate changes to the policy or by adopting appropriate mitigating measures;
- c) Any asymmetrical equality impacts caused by the policy are intentional because they are specifically designed to promote equality of opportunity for particular groups of disadvantaged people;
- d) By amending the policy there are better opportunities to better promote equality of opportunity and/or good relations.

#### No impact (none)

- a) The policy has no relevance to equality of opportunity or good relations;
- b) The policy is purely technical in nature and will have no bearing in terms of its likely impact on equality of opportunity or good relations for people within the equality and good relations categories.

| Designing a Public Service   |                   |                    |                              |  |
| Delivering a Public Service  |                   |                    |                              |  |
| 1D. Please provide the official title (if any) of the Policy, Strategy, Plan or Public Service   |                   |                    |                              |  |
| document or initiative relating to the category indicated in Section 1C above.   |                   |                    |                              |  |
| LCCC Sustainability Strategy and Climate Action Plan 2025-2028   |                   |                    |                              |  |
|  |                   |                    |                              |  |
|  |                   |                    |                              |  |

1E. Please provide details of the aims and/or objectives of the Policy, Strategy, Plan or Public Service.

The strategy set out LCCCs vision and goals in terms of sustainability and intends to 1. Create an evidence base, identifying how our climate is changing and the challenges and opportunities that we face using expert scientific information including the Climate Change Committee (CCC) progress reports 2. Outline our goals and ambitions for mitigating Climate Change within the organisation 3. Meet the requirements of the Climate Change Act (Northern Ireland) 2022 and 4. The Climate Change (Reporting Bodies) Regulations (NI) 2024 5. Develop a high-level Climate Action Plan, setting out the critical actions needed to deliver our goals, enabling us to mitigate against the impact of climate change, adapt and thrive.

| 1F. What definition of 'rural' is the Public Authority using in respect of the Policy, Strategy, Plan or Public Service?   |  |  |
|--|--|--|
| Population Settlements of less than 5,000 (Default definition).  Other Definition (Provide details and the rationale below).  A definition of 'rural' is not applicable. |  |  |
| Details of alternative definition of 'rural' used.   |  |  |
|  |  |  |
| Rationale for using alternative definition of 'rural'.   |  |  |
|  |  |  |
| Reasons why a definition of 'rural' is not applicable.   |  |  |
|  |  |  |

(Revised) April 2018

# SECTION 2 - Understanding the impact of the Policy, Strategy, Plan or Public Service

| Public Service  |
|---|
| 2A. Is the Policy, Strategy, Plan or Public Service likely to impact on people in rural areas?  |
| Yes No X If the response is NO GO TO Section 2E.  |
| 2B. Please explain how the Policy, Strategy, Plan or Public Service is likely to impact on people in rural areas.   |
|   |
|   |
|   |
|   |
|   |
|   |
| 2C. If the Policy, Strategy, Plan or Public Service is likely to impact on people in rural areas <u>differently</u> from people in urban areas, please explain how it is likely to impact on people in rural areas differently. |
|   |
|   |
|   |
|   |
|   |
|   |
|   |

| 2D. Please indicate which of the following rural policy areas the Policy, Service is likely to primarily impact on.  | Strategy, Plan or |
|--|-------------------|
| Rural Businesses   |                   |
| Rural Tourism  |                   |
| Rural Housing  |                   |
| Jobs or Employment in Rural Areas  |                   |
| Education or Training in Rural Areas   |                   |
| Broadband or Mobile Communications in Rural Areas  |                   |
| Transport Services or Infrastructure in Rural Areas  |                   |
| Health or Social Care Services in Rural Areas  |                   |
| Poverty in Rural Areas   |                   |
| Deprivation in Rural Areas   |                   |
| Rural Crime or Community Safety  |                   |
| Rural Development  |                   |
| Agri-Environment   |                   |
| Other (Please state)   |                   |
| If the response to Section 2A was YES GO TO Section 3A.  |                   |
| 2E. Please explain why the Policy, Strategy, Plan or Public Service is NOT likely to impact on people in rural areas.  |                   |
| The Sustainability Strategy and Climate Action Plan are inward looking documents focused on council functions and operations. It is unlikely to have any impact on people in rural areas as services will continue to be delivered as they are at present. Any potential Projects that may be developed as a |                   |

result of the adoption of the Sustainability Policy that impact rural areas as a result, will have individual

rural needs assessments carried out specific to that project.

The development of this Strategy and CAP will not impact on people in rural areas differently, it will have a positive impact collectively, as both town and rural dwellers will all reap the benefits from improved Sustainability.

## **SECTION 3 - Identifying the Social and Economic Needs of Persons in Rural Areas** 3A. Has the Public Authority taken steps to identify the social and economic needs of people in rural areas that are relevant to the Policy, Strategy, Plan or Public Service? No X If the response is NO GO TO Section 3E. Yes 3B. Please indicate which of the following methods or information sources were used by the Public Authority to identify the social and economic needs of people in rural areas. Consultation with Rural Stakeholders **Published Statistics** Consultation with Other Organisations Research Papers Surveys or Questionnaires Other Publications Other Methods or Information Sources (include details in Question 3C below). 3C. Please provide details of the methods and information sources used to identify the social and economic needs of people in rural areas including relevant dates, names of organisations, titles of publications, website references, details of surveys or consultations undertaken etc.

| 3D. Please provide details of the social and economic needs of people in rural areas which have been identified by the Public Authority?  |
|---|
|   |
|   |
|   |
|   |
|   |
|   |
|   |
|   |
| If the response to Section 3A was YES GO TO Section 4A.   |
|   |
| 3E. Please explain why no steps were taken by the Public Authority to identify the social and economic needs of people in rural areas?  |
|   |
| and economic needs of people in rural areas?  The Sustainability Strategy and Climate Action Plan are inward looking documents focused on council functions and operations. It is unlikely to have any impact on people in rural areas as services will continue to be delivered as they are at present. Any potential Projects that may be developed as a result of the adoption of the Sustainability Policy that impact rural areas as a result, will have individual  |
